Parker Macomber

303-746-4947 | parker.macomber@ucdenver.edu | GitHub: https://github.com/Universe1988/ParkerMacomber.github.io | Aurora, CO

SUMMARY OF QUALIFICATIONS

- Strong analytical skills to fetch data through databases to understand outcomes of situations
- Experience with working on building websites and databases, to help display and present information in a clean, easy to understand format.
- Tools and Framework used include: GitHub, Tableau, Jupyter notebooks, MySQL, PHPmyadmin, SnowFlake, MicroSoft Office Suite (Word, Excel, Powerpoint, & etc…), Google Drive, and Docker
- Effective at collaborating and communication when it comes to project related work
- Programming experience with a specialty in**:** SQL, HTML, CSS, Python, C, C++, and Assembly Language

EDUCATION

Bachelor of Arts, Computer Science, GPA 3.495 Dec. 2025

University of Colorado Denver, Denver, CO

- Deans list **-** Spring 2023, Spring 2025, and Fall 2025.

CERTIFICATION

Google Data Analytics Certification Jan. 2026 - Apr. 2026

- Analysis data using Excel spreadsheets, SQL, and Python to create user friendly CSV files.
- Visualize trends using Tableau and Excel spreadsheets to share data with stakeholders.

PROJECTS

UFC Database, Database Course - SQL, MySQL Jan. 2024 - May 2024

- Built an Ultimate fighting championship database using 3-schema, ER/EER diagrams, and the use of normalization. Finalized the project with writing relational algebra and SQL to retrieve queries within the database built in PHPmyadmin (MySQL).

Covid-19 Data Analyst - SQL, Excel, BigQuery

- Analysed data given from the worldwide Covid-19 public dataset in BigQuery, using SQL to harvest data to find information on countries with the highest number of cases, highest death rate, cases per 100 thousand residents per country. All to determine what country was impacted the most within the Covid-19 pandemic.
- Illustrated the outcomes in Tableau to make the data more user friendly and easier to read. Used heat maps, bar charts, and line graphs to illustrate the significance of the data.

Portfolio Website - HTML, CSS, GitHub Aug. 2026

- Architected and deployed a responsive personal portfolio website to showcase academic and personal software engineering projects, providing a streamlined user experience and concise dynamic overview of technical competencies. Utilized GitHub for version control and source code management, implementing custom HTML semantic structure and modern CSS styling to transform plain UI outputs into a visually pleasing interface.

EXPERIENCE

Voting Stock Holder - Oracle Oct. 2026 - Current

- Participates in voting for the board of Oracle to help ensure that everyone on the board is competent in what they can do for the company. This is to help ensure that a data company is transparent and to ensure that there are no issues with security within Oracle's cloud system.

Museum Volunteer - Denver Museum of Nature and Science, Denver, CO Oct. 2026 - Current

- Supported the museum by engaging with guests and learning how the museum operates. Engage with museum workers to make sure everything flows correctly and to allow me to learn more about the science of information.

Crew Member - PapaMurphy's, Centennial, CO May. 2021 - Current

- Worked as a Crew member where we communicated and worked as a team to keep everything running smoothly.
- Experience with training new employees, where I was able to train them on certain things to meet corporate standards.
